- Zoltan Szege**, OEP - National Health Insurance Fund Administration of Hungary

Interregional Cooperation & Networking

Dear participant,

The INCO-HEALTH Final Conference is focusing on the experience gained through the interregional cooperation established by the centres of expertise - “regional antennas” - set up in the regions covered by the operation in the health and insurance card (HIC) domain and, more generally, in the e-Health sector.

This event is willing to gather stakeholders involved in the mentioned areas for illustrating major results achieved by the operation and discussing relevant challenges that public administrations are facing in deploying HIC strategies. The strategic approach to HIC under the legal, organisational and technical viewpoint is the key element which has been leading the INCO-HEALTH partners in carrying out the operation activities and will remain as a pivotal factor for continuing the cooperation amongst them, even beyond the operation conclusion.

The networking activities experienced by the involved regions will reinforce the trans-national cooperation in this field, which is going to become more and more strategic in view of an effective patients’ mobility in the European Union countries and of the complex management of healthcare sector in an enlarged Europe. The strong commitment of the INCO-HEALTH partners represents a cornerstone for extending future cooperation with other regional and national public authorities and an element for further sharing knowledge and thus leveraging innovation in public administration.

The INCO-HEALTH team
