The 7 major challenges for the future of the European Health Care System:

- **Mobility of patients, health professionals and workers within the EU**
- **The European Health Insurance Card and electronic smartcards (NETC@RDS)**
- **Tackling health inequalities**
- **Coping with an increasing ageing population, and the migration of elderly people from northern Europe to southern Europe**
- **Protecting European Citizens against health threats, from pandemics to bio-terrorism and HIV-AIDs**
- **Promotion of centres of reference in Europe**
- **Developing the European Research Area for technological innovation**
